South Texas Veterans Health Care System announced that COVID-19 vaccinations are being offered to enrolled Veterans of all ages by appointment only.

“To date South Texas has vaccinated over 45,000 Veterans with their first dose vaccination,” said Medical Center Director, Christopher Sandles.

“VA’s vaccine quantities continue to grow, and we will progress toward our goal of offering the vaccine to enrolled Veterans as supply allows.”

Enrolled Veterans are being contacted through VA’s VeText appointment system.

Veterans receive a text message from the San Antonio VA with a proposed date and time for an appointment.

Once the Veteran confirms their appointment, they receive confirmation of the date and time of appointment.

Veterans who are not enrolled or do not currently receive care at VA can visit www.va.gov/health-care/how-to-apply/

In Kerrville, we offer 150 appointments per day, Monday – Friday.

We are watching the weekday numbers to see if a Saturday clinic is needed.
